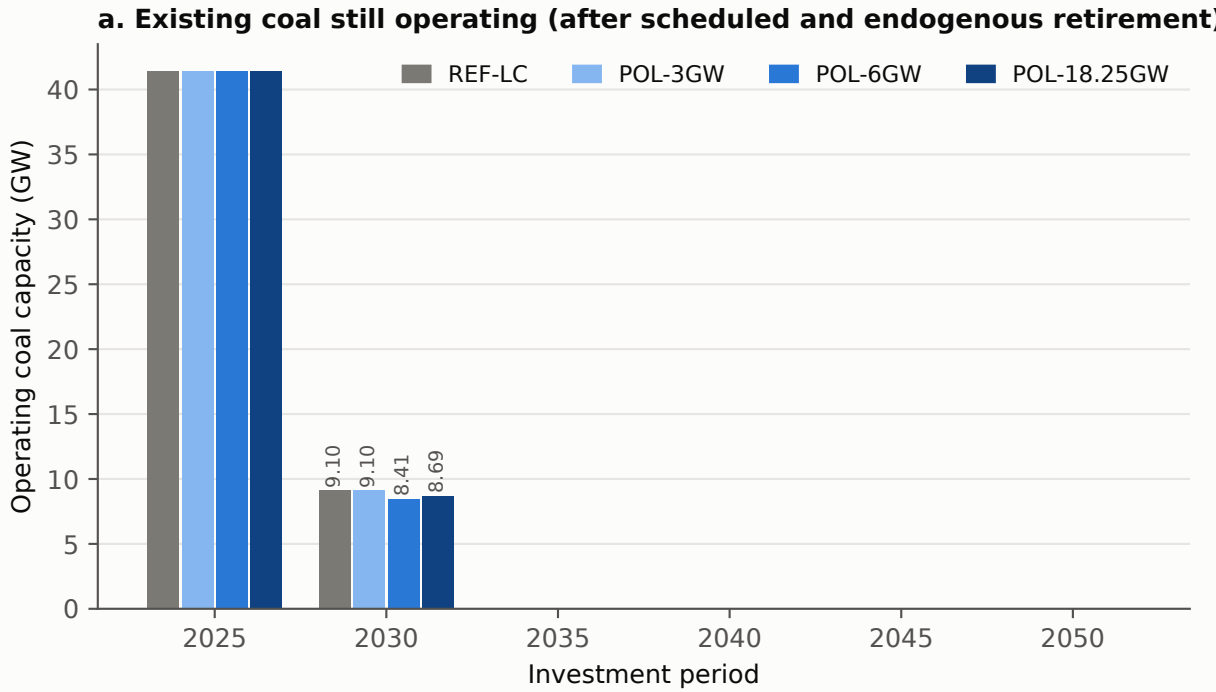
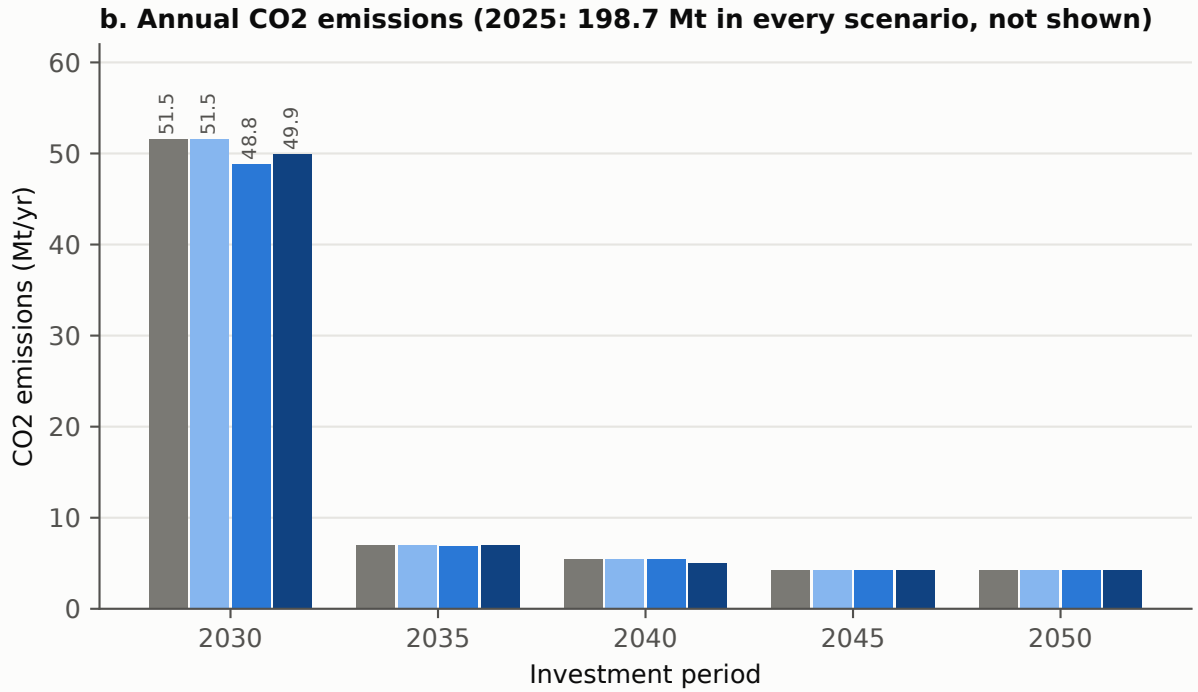
Coal retirement and CO2 emissions

Binding mandates bring forward Lethabo retirement in 2030 (+687 MW POL-6GW, +402 MW POL-18.25GW) and cut 2030 CO2 by 2.7 and 1.6 Mt; all coal is retired from 2035.





Source: PyPSA-RSA gas-to-power study, saved solved networks (REF-LC 22 Oct 2026; POL runs 27 Oct 2026), commit db90bff. 1-node, LC-182h development results - not hourly-resolution findings.
CO2 = generation x outputs/generator_emissions.csv factors; stand-by emissions excluded. Coal stand-by costs are absent from the objective (unresolved review item), which may affect retirement timing in all scenarios.
