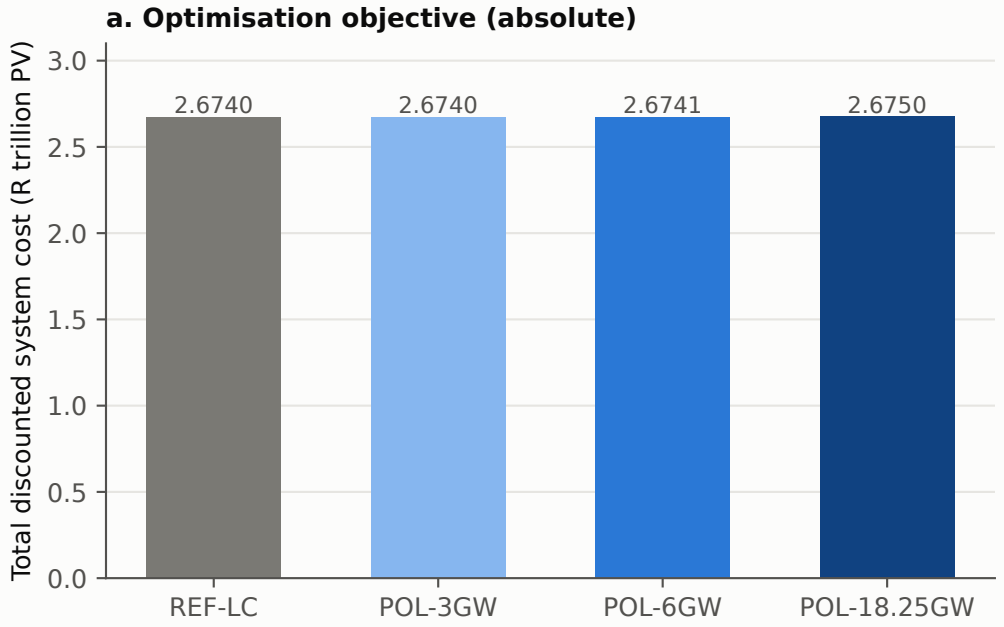
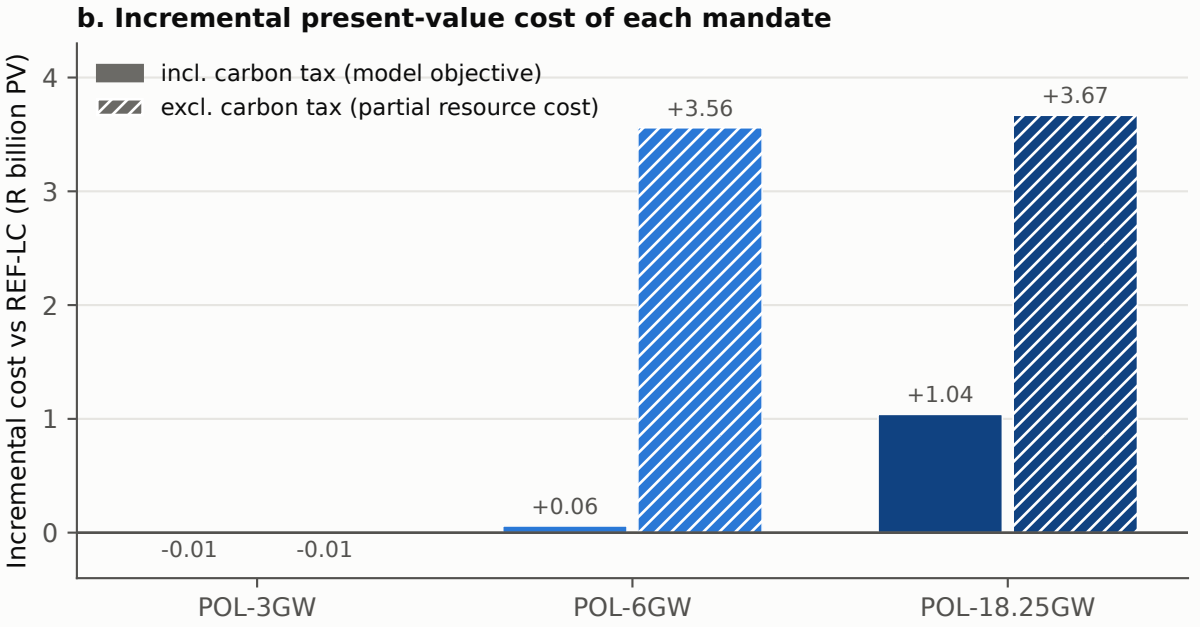
Total system cost and incremental cost of the gas mandates

Objectives differ by at most 0.04%. Including carbon tax the mandates cost -R0.01 / +R0.06 / +R1.04 bn PV; excluding it about +R3.6-3.7 bn for POL-6GW and POL-18.25GW.





Source: PyPSA-RSA gas-to-power study, saved solved networks (REF-LC 22 Oct 2026; POL runs 27 Oct 2026), commit db90bff. 1-node, LC-182h development results - not hourly-resolution findings.
POL-3GW's -R9.5 m is within solver tolerance (final barrier gaps R6-14 m; REF-LC gap not stored). 'Excluding carbon tax' removes the carbon-tax payments (a transfer) and is a partial resource-cost comparison only, not a welfare assessment (no social cost of carbon; stand-by costs absent; T6 sign unresolved).
